

**Agrosonics  
- 6 Day Test  
Spring Onion -  
Regrow**

This test was done with organic spring onions regrown on a window sill in the winter. One glass was grown in a separate room with no Agrosomics treatment. The other room has one Agrosomics booster suspended above the glass. Another glass was placed at 1 foot and another at 3 feet. Using the 3 cycle of 55 minute treatments daily. The differences were clear even on day 3, and overall average of 17% increase in growth!
